REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

It is not agreed with the applicant that the certified English translation filed Oct. 5, 2006, would overcome the 102(e) rejection because it appears that the certified translation is not true from the original Sweden application No. 0200999-1 for the followings reasons: (1) the translation discusses Figs. 1-12 while the Sweden application includes only 5 figures (Figs. 1-5). (2) The translation includes 3 claims (claims 1 to 3) while the Sweden application includes 4 claims (claims 1 to 4). (3) The specification in the translation includes total 27 paragraphs while the specification of the Sweden application includes only 14 paragraphs.

In further review the claimed invention as amended in claim 1 with the Pyo reference, Pyo discloses a flexible, soft and bendable eyeglass frame wherein the frame can be custom shaped by the user's finger pressure and then hardened by exposure to light. Pyo fails to disclose the frame material may be shaped at elevated temperature. Pyo also fails to disclose the claimed limitations "said formable material is fixed to its in form and soft and bendable when in an unformed, original state, and is formable at elevated temperatures to form said frame in a configuration that is cooperatively shaped to the user's face, and being bendable after said material returns to a temperature of the original state". Therefore claims 1-6 could be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
